# Kabisa

INTERNATIONAL LTD

An Investment Of

African farm lands are rich, but road networks are very limited. Getting crops from the field to the nearest road often means miles on a single track trail.

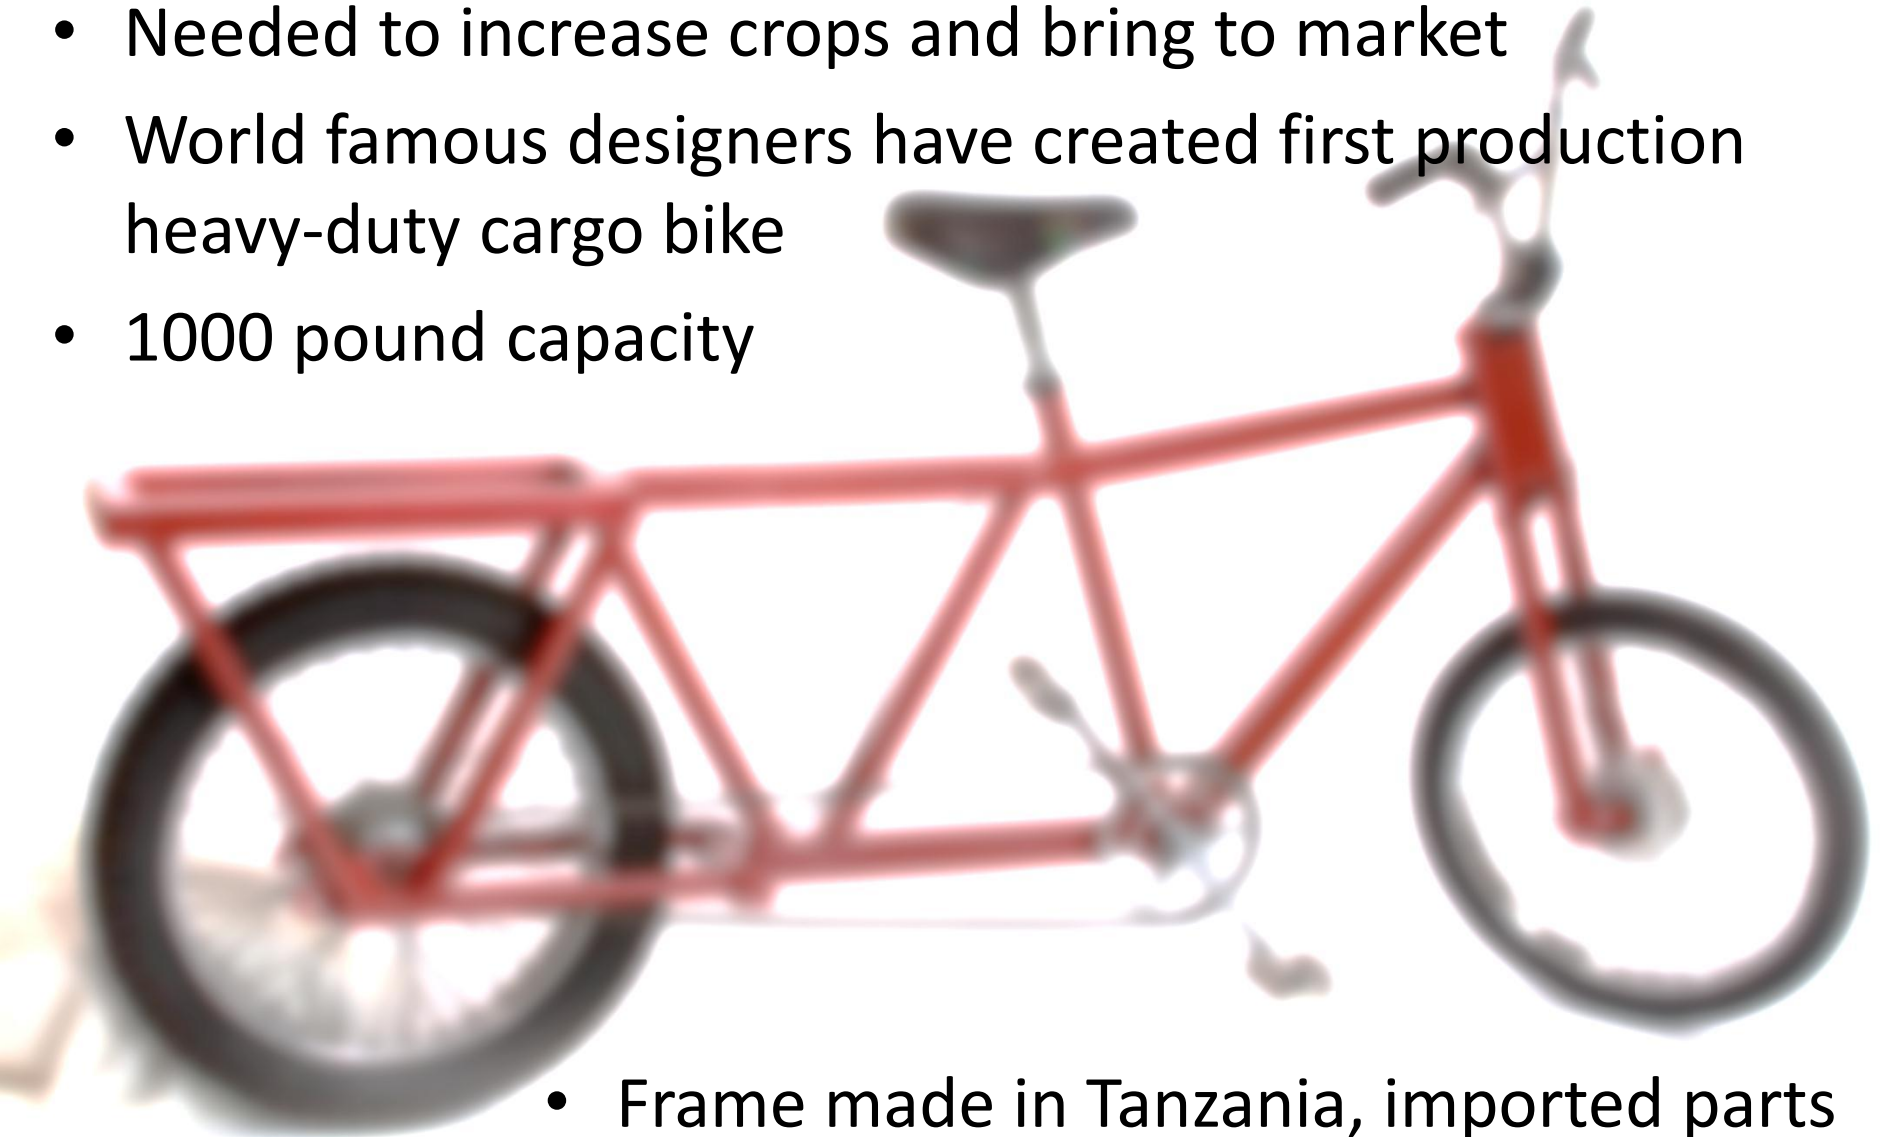

# The Primary Trucking System

**The wheel is still one of the greatest inventions on earth.  
But available bikes do not survive long under the loads**

- A bicycle fits in single track for farmers = 4X moved
- Needed to increase crops and bring to market
- World famous designers have created first production heavy-duty cargo bike
- 1000 pound capacity

- Frame made in Tanzania, imported parts
- Still working to patent design elements

# Plan Milestones

## Prepare – 6 Months

- Identify site, arrange for tax abatement, other local preparations
- Enlist assistance of western bike manufacturer for design and purchasing power

## Build – 2-3 Months

- Order inventory and renovate location
- Hire full employee complement and register business, sell first orders

## Launch

- Begin manufacturing and shipping
- In time and with success, broaden product line

Kabisa is not publishing its detailed plans to protect its prospects from competition. If you are interested in learning more, contact us at [info@cheetahdevelopment.org](mailto:info@cheetahdevelopment.org).
